What those who know us say

Unparalleled Lean development support

Having one of the most skilled and experienced Operational Improvement teams brings many advantages for us at VSE - **not least an understanding of the precise reasons for the failures across numerous competitors, to not only help improve operational/financial performance for their client but crucially, sustain them.**

VSE prides itself on operating very differently;

- we directly apply the **precise experience/skills** from within our team
- we **engage** the clients' teams and involve them in the improvement process
- we make ourselves **accountable** to delivering targets

*"Together
we make
sure we
get you
there"*

The VSE Promise

Our unique approach - Driven by Values

Our Values guide our behaviours and every client partnership

- Skill Matching:

Whether the client requirements are operational improvement, supply chain, logistics OR sector-experience required, due to the depth and experience in the team we will have a match to lead the partnership

- Onboarding:

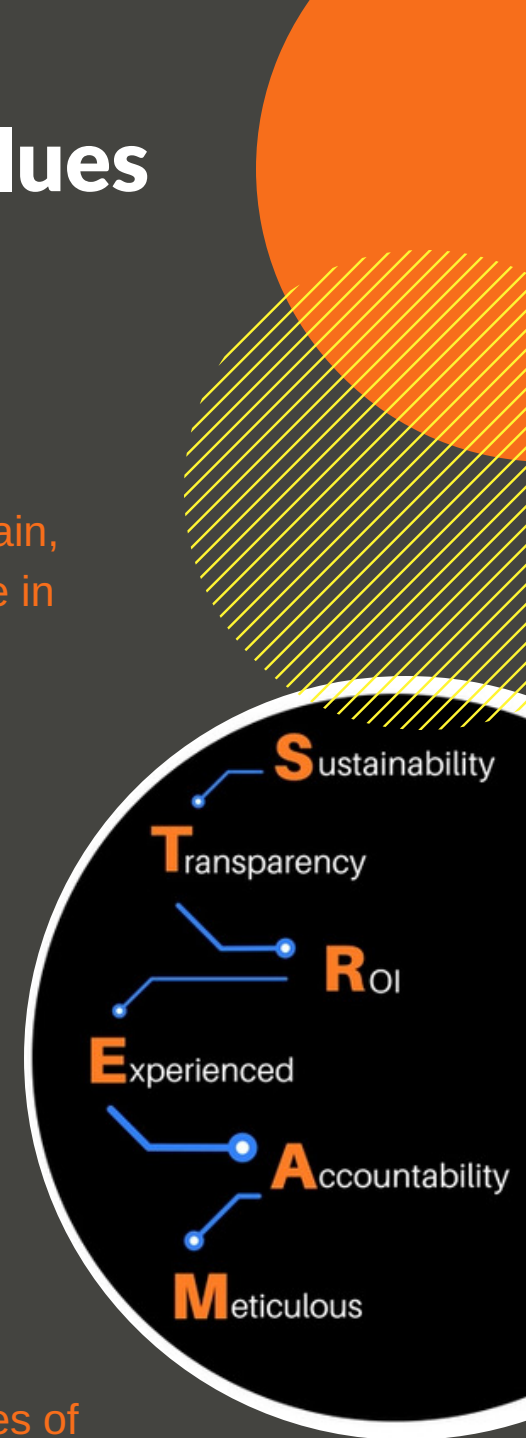

The following areas of the Partnership are agreed: Relationship Planning (Who/What/When) / Operational AND Financial Targets / Timescales / Reporting Structure & frequency / Visual Management content & location

- Live Support Partnership:

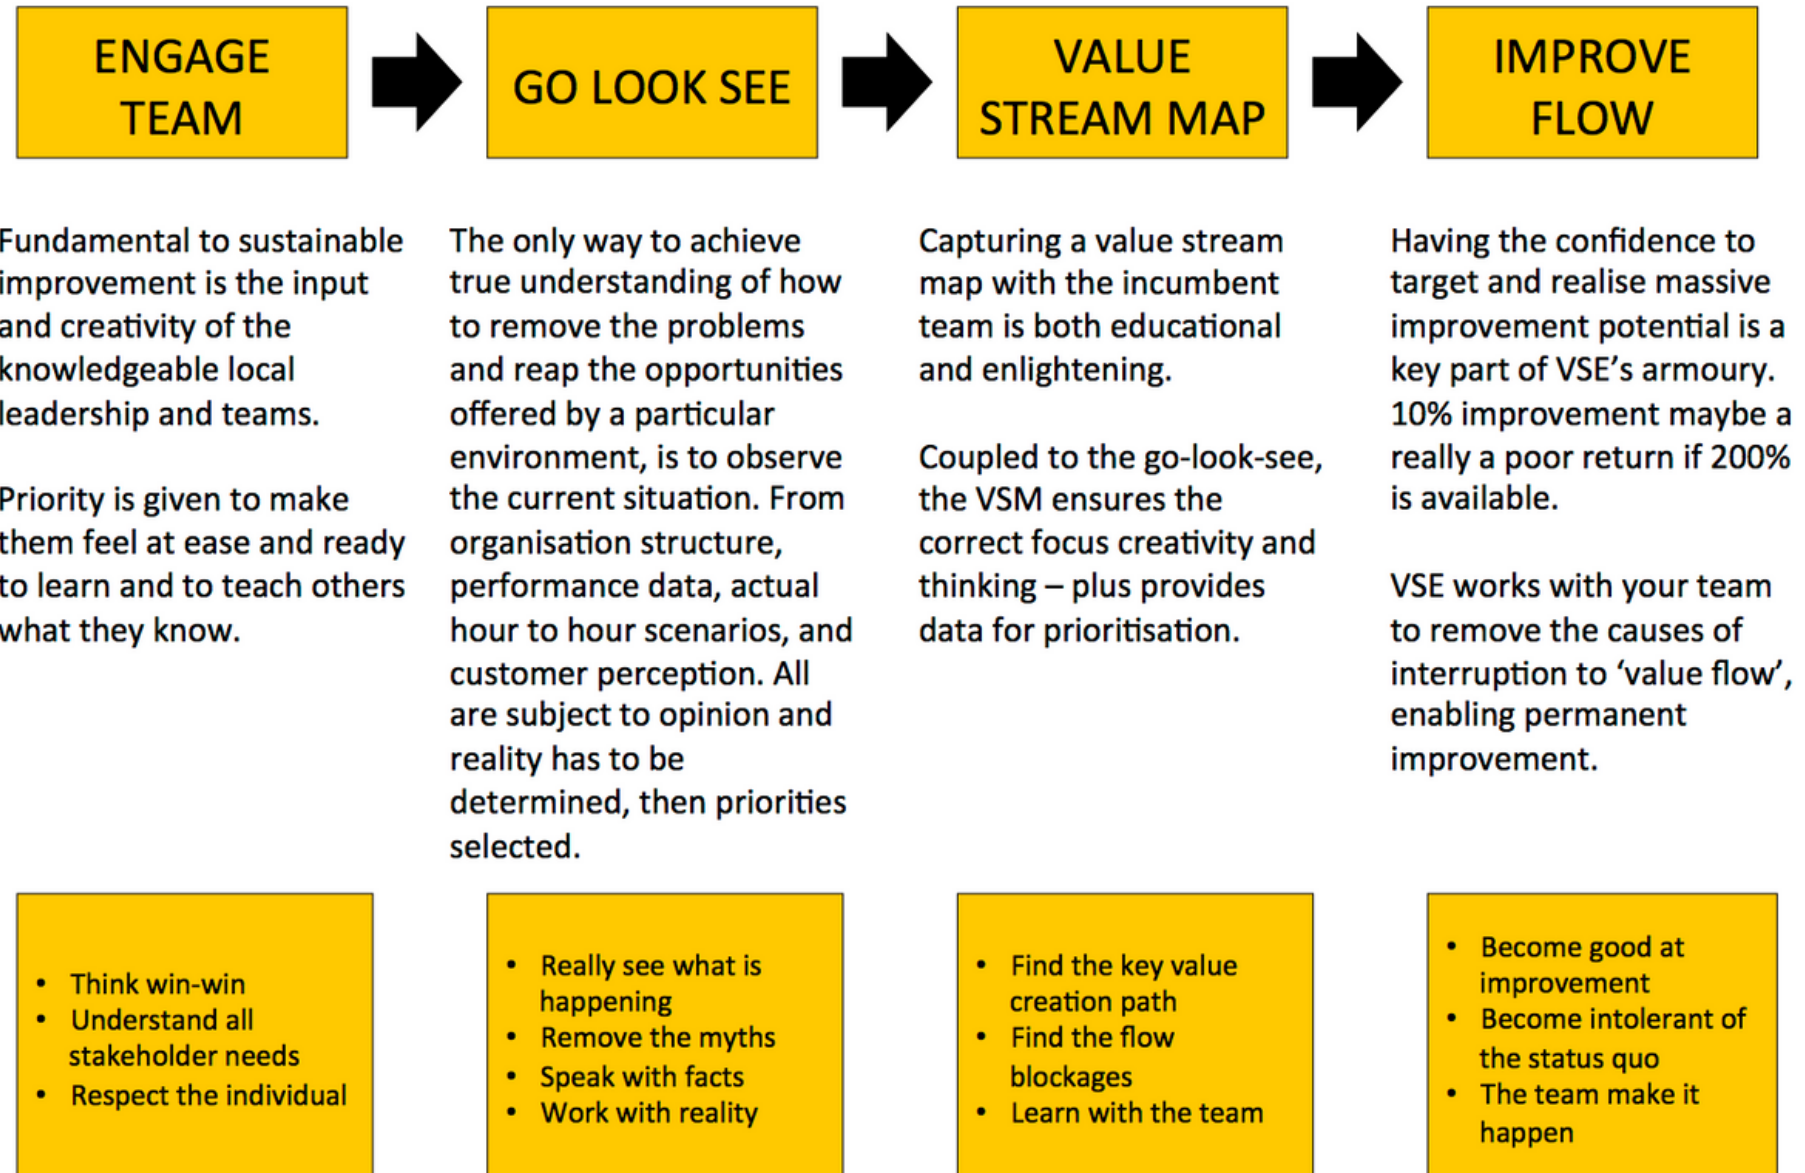

Adhering to the agreed Targets and Processes signed off within the Onboarding phase, the VSE resources are deployed and results vs targets monitored in real-time through Visual Management for total transparency

- Sustainability:

Another stage unique to VSE: In order to make sure that the gains and improvements to both Operational flow and margins are sustained, a series of follow-ups (on-site and remote), together with on-going support are applied

The VSE Lean Development Process

Our specialisms

What those who know us say...

'The value stream based approach coached by the VSE team was the basis of our successful performance improvement plan'.

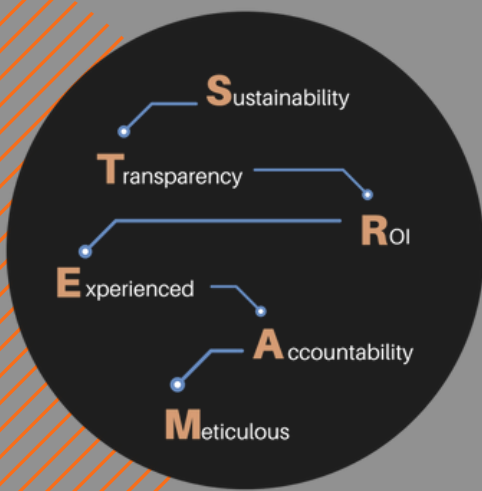

Matt Anderson, Senior Vice President, Rolls Royce

'The improvement approach was people centric with productive challenges and clear focus on targets we needed to achieve'.

Marco Goepfert, Senior Manufacturing Exec, Daimler

'The hands on approach by the guys at Value Stream Experts gave us some excellent operational and financial results'.

Paul Robinson, CEO, Nottingham Trams

"Progress is impossible without change and those that cannot change their mind, cannot change anything"

George Bernard Shaw
